

AUTOMATION PACK

TEAM
ACCESS

TEAMCARD AUTOMATION PACK provides the key physical components required to upgrade existing powered turnstiles to enable unattended entry using our state-of-the-art Android Head Unit.

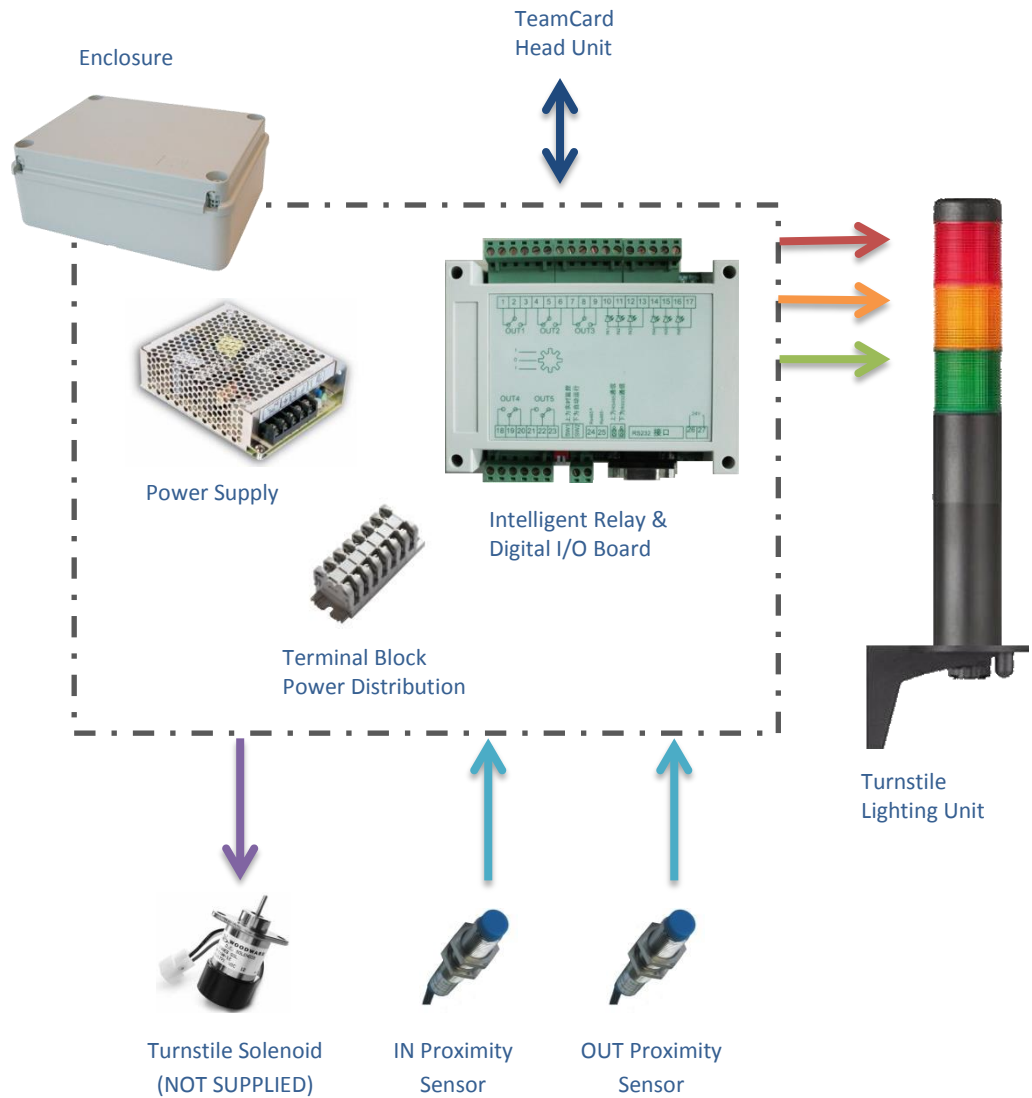

This pack includes dual-sensors, a lighting unit and an intelligent relay & digital I/O board to interface seamlessly with our Head Unit.

SPECIFICATION

GATE AUTOMATION PACK

KEY COMPONENTS

SPECIFICATIONS

- Intelligent Relay Board
 - Output Relays (for Turnstile Solenoid & Turnstile Lights)
 - Digital Inputs (for reading inputs from proximity sensors)
 - Serial connection to TeamCard Android Head Unit
- Dual Proximity Sensors
 - IN - Detect when turnstile has begun turning
 - OUT - Detect when turnstile rotation is near complete
- Turnstile Lighting Unit
 - RED, AMBER, GREEN LED Indicators - 37mm Diameter
 - 24V, 150mA, 50000 hours, IP 65 Rated
- DC Switching Power Supply - 24V, 3.2A, 75W
- Power distribution terminal block
- Water Resistant Enclosure
